About Me

I'm a student at the University of Douala, I'm 22. I'm a full-stack web developer, and I use ReactJS (NextJS) to build frontend applications and Node (Express and NestJS) to build backend applications. My main aim is to build, test, and deploy web apps using JavaScript technologies.

Educational

2018-2019   **Makepe High School**
It's where i got my bachelor's degree

2021 - present   **University of Douala in Cameroon**
I study computer science in the university of Douala since 2021 and i'm in level 2 now.

Experiences

2021 - present

Learning period
I started with the frontend development in 2021 with HTML, CSS and Javascript. Then i continue by learning ReactJS and Nodejs/ ExpressJs frameworks. I realized some small projects during my learning period.

2022

E-Shoes e-commerce app
From January to May 2021, I built an application that can help sell shoes with JavaScript only.Users can add items to a card or remove them and view the total price changing in real time.
link : https://github.com/ivan01-tech/js-ecommerce-webs-ite.git

Tetris Game
From August 2022 to Jan 2023 , with the help of many online tutorials and people, I was able to create a nice tetris game with reactjs only.
link: https://thriving-gingersnap-6892a7.netlify.app/

Note-taking app
In the month of November 2022, i built an application that can help people store their notes, modify them, and delete them. They can also search them by tags. I used ReactJS and Typescript to build it.
Link over here: https://note-taking-app-phi.vercel.app/

Chat application
During the last week of 2022, I built building an application with NodeJS and socket.io where someone can send messages and images to a group of person in a specific room in real time.

2023

Invoice Generator
From February 2023 to May 2023, I built an application to generate invoices and send them to someone by email. I use ReactJS, NodeJS (Express), and Nodemailer to do that.
Link to the project: https://github.com/ivan01-tech/invoice-generator

Nested comments system
I also built a blog with a system of comment like Reddit where someone can add, update,and delete their comments, and also reply to other comments in an infinite way. I did it by using ReactJS, Node (Express), Prisma, and Tailwind CSS.
